

Purdue Course Ratings - Instructions Manual

Team 17: Elvin Uthuppan, Kenny Zheng, Manasi Goel, Kendall Z Bowles

Instructions for Running the Application

The following are a detailed set of instructions for running our application.

1. Install the latest version of Android Studio.
2. Select *Tools -> Android -> AVD Manager*
3. Create a new Virtual Device, and select the Nexus 5. Leave all other settings as default.
4. Follow the prompts to finish installation.
5. Start the Android emulator, and download the APK file given to you through the emulator. You can do this by emailing the APK file to yourself (on your own computer or phone), opening the emulator's built-in Chrome browser, opening your email, and downloading it there.
6. When the APK file is downloaded to the emulator, open it and follow the prompts to install the app.
7. The app should now be present in the app list within the emulator. Simply select it to run it. If you close and run the same emulator again, the application should still be installed.
